POST-OP INSTRUCTIONS FOR VULVAR, CERVICAL, AND ENDOMETRIAL BIOPSY

A small piece of tissue has been removed by your doctor. Results will be available in 1-2 weeks. In the meantime, call us for:

- Fever greater than 101.0 degrees Fahrenheit.
- Excessive bleeding (greater than one pad per hour).
- Pain not controlled by over-the-counter medication.

Avoid tampons, douching, vaginal intercourse, and swimming for one week.

- You may take Advil, Tylenol, or Aleve as needed for pain.
