

Please note that approximately one out of five patients require additional views, ultrasound tests, or other additional examinations, which are not included in the **Standard Breast Screening Fee**.

Additional examinations will require additional fees.

I understand that mammography is only one part of a complete breast screening examination. Physical examination and self-breast examination are the other parts. A physical examination is essential, even if my mammogram does not show any abnormality. I agree to have my breast-physical examination with my own physician.

I understand that the technologist performing the exam will physically handle my breast for positioning purposes, and that I may experience mild to moderate pain from necessary compression of my breast. This compression may also cause temporary discoloration and/or bruising of my breast.

Although mammography is the most reliable method for detecting breast cancer when it is early and still too small to feel, a mammogram does not detect all breast cancers. A physical examination or breast self-examination may detect a cancer that is not seen on the mammogram.

I understand that if my screening mammogram is abnormal, I will require further evaluation by a physician. I agree to take responsibility for follow-up and to arrange for an appointment with my physician. I agree to provide previous mammogram (if taken at another facility) for comparison to today's mammogram.

I agree to provide follow-up information to ADC for statistical purposes only. All results and follow-up will be kept confidential.

I understand that it may be necessary for ADC to compare prior exams with my current exam. **I hereby authorize:** _____

to disclose medical information concerning my current exam to the:

***The Austin Diagnostic Clinic – Women’s Imaging Center
12221 Mopac Expressway N, Austin, TX 78758-2483
Phone: 512-901-4396 Fax: 512-901-3933***
